Pressroom Process Control Tools

**DO YOU CONTROL YOUR PRESSROOM,**  
*or does it control you?*

Predictable results from your printing system are possible if proper controls are put in place. Variables in the pressroom cause waste of raw materials and valuable production time. Fujifilm offers a wide range of process control tools and technical services that can help bring the pressroom back under your control.

**Fujifilm Pressroom Control Products:**

- **Conductivity/pH Meters**
- **Refractometers**
- **Shore A Durometers**
- **Dosing Equipment/Proportioners**
- **Water Filtration Systems**
- **Packing Gauges**
- **Color Management Tools**
- **Pyrometers**
- **Taskero Universe**
- **Unsurpassed Technical Support**

### CONDUCTIVITY/PH METERS:

This compact digital unit helps keep fountain conductivity under control. Forecast fountain tank changes before conductivity shifts cause waste. Fully utilize your fountain concentrate by changing solution only when needed. Includes pH and conductivity probes in one compact unit.

PART# 900042931

### REFRACTOMETER:

Is your dosing equipment mixing the alcohol replacement accurately? Are extra wetting agents being added - throwing the system out of balance? This simple, compact and inexpensive tool helps keep your alcohol replacement concentration under control by measuring the refractive index of solutions.

PART# 900023583

### DOSING EQUIPMENT/PROPORTIONERS:

Precisely dose your fountain concentrates and alcohol replacements economically. Fujifilm can help design a system that fits the needs of your pressroom - simple to most complex. Eliminate human error. Ask about equipment options as well as lockable cabinets.

PART# 900025530

### SHORE A DUROMETER:

Are you experiencing waste and lost press time because of rollers not meeting the press manufacturer's specifications? Are your operators fighting ink/water balance and pressure issues on press? Measure your roller durometer regularly and change problematic rolls before they cause wasted time and expense.

PART# 900030864

### WATER FILTRATION:

Eliminate variables with these cost-effective water purification systems. High water conductivity levels and the daily variability of many municipal water systems can send your fountain system unpredictably out of control. Let Fujifilm design a system that meets your water filtration needs - from cost effective de-ionizing units for small shops to complete systems that purify, mix, store, monitor and pump in multi-press environments.

PART# 900033114

### PACKING GAUGE:

Are your blankets packed properly to ensure proper ink transfer? Even new presses can have variation in cylinder undercut from unit to unit. Without the proper measuring tools, you can't be sure. Proper blanket and torque help extend blanket life and improve print quality.

PART# 900011845

### COLOR MANAGEMENT:

Color management can be the single most important step you take toward saving time and avoiding waste. Fujifilm offers tools and expertise to help match your proofs quickly and economically.

PART# 900039963

### PYROMETERS:

Are your rollers running hot due to excess pressure, friction or defective bearings? Is your fountain solution at the proper temperature? Diagnose temperature-related press problems with this inexpensive digital pyrometer.

PART# 900064297

Taskero Universe

### TASKERO UNIVERSE:

Taskero Universe is a suite of measurement tools designed to provide the ultimate in quality control. Taskero Universe allows control and management of color from pre-press all the way through the pressroom.

### TECHNICAL SUPPORT:

With Fujifilm's expert Pressroom Sales team offering day-to-day support and our world class Technical Solution and Support team, Fujifilm can and will get your pressroom on track and keep it there.

### THE FUJIFILM GREEN POLICY

We at Fujifilm believe that "sustainable development" of the Earth, mankind, and companies in the 21st century is an issue that must be addressed with the highest priority. As a socially responsible corporation, we actively undertake corporate activities with our environmental values in mind. We strive to be a dedicated steward of the environment and assist our customers and corporate partners in doing the same.
