Graph Expo 2007 – Booth #4406

Look to FUJIFILM Graphic Systems U.S.A., Inc. for Pressroom Products, Services

VALHALLA, N.Y. (Sept. 9, 2007) – FUJIFILM Graphic Systems U.S.A., Inc. boasts a robust portfolio of products and services to meet all of your pressroom needs. Fujifilm will highlight its full line of products – including the new CD-14 ink blending station – during Graph Expo 2007 on Sept. 9-12, 2007 at McCormick Place Convention Center in Chicago.

Fujifilm has partnered with the industry's best manufacturers to provide customers with pressroom supplies, including everything from blankets and sundry items to ink and chemistries.

In addition, Fujifilm also offers ink blending stations that can give printers the ability to make custom and critical color matches in house. With a complete system, including dispensers, software and spectrophotometers, printers can eliminate the need for outside blending services and their associated costs.

The CD-14 ink blending station is ideal for most printers, thanks to its compact design and the level of accuracy it's able to achieve. Standard inks can be made quickly and accurate estimating software helps you mix only the ink you need, preventing overmixing and preserving supply.

The optional FIM 30 scale is designed for larger batches and can accurately measure up to 66 lbs.

The CD-14 is available in manual or automated versions and its optional mixers and label printer interface allows operators to multi-task. Remote diagnostics and spectrodensitometer links are also available, making custom color matches a reality.

In addition to a full line of pressroom products, Fujifilm offers a nationwide network of technical service and support, including color specialists dedicated to helping customers get control over and maintain their color, from prepress through to the pressroom.

Graph Expo 2007 attendees can see the CD-14 and learn more about our pressroom offerings at Fujifilm's Booth #4406 throughout the show. For more information, please visit Fujifilm on the web at www.fujifilmgs.com.

About Fujifilm

FUJIFILM Graphic Systems U.S.A., Inc. is the nation's largest distributor of equipment, consumables and technical services for the graphic communications industry. Fujifilm provides its customers with products and technologies from best-in-class manufacturers as well as a nationwide network of technical service and support and is fully committed to its customers, which range from commercial printers, color separators, service bureaus and graphic design/art studios to newspapers, publishers and advertising agencies.

Whether it's information on emerging technologies or reliable delivery of supplies, customers know they can rely on Fujifilm – the industry's source for technology, solutions and support. For more information, please visit www.fujifilmgs.com.
